DIRECTORS OF GRADUATE STUDIES MEETING 02/28/13

Thesis Office: Common Questions

1. Process
   a. Preliminary review: prior to defense
   b. Format approval date March 15th
   c. Check off of old and new versions
   d. Thesis release date April 22nd
   e. New: quick examination of all manuscripts submitted for preliminary review or format approval

2. Signature Sheets
   a. 1 original each of Supervisory Committee Approval form and Final Reading Approval form

3. Previously Published Material
   a. Reprints acceptable if approved by department

4. Hard copies for Chairs, Departments
   a. Note: the Library produces and pays for hard copy for Archives
   b. Personal copies list

5. ProQuest Issues
   a. USpace
   b. ProQuest Website

6. Students Who Submitted Manuscripts to Thesis Office without Finalizing Editing Process
THESIS OFFICE DATA

- Christine Pickett, Thesis Editor, 801.581.8893 / christine.pickett@gradschool.utah.edu
- Kelly Harward, Assistant Thesis Editor, 801.581.7643 / kelly.harward@gradschool.utah.edu
- Tracy Rees, Assistant Thesis Editor, 801.581.5076 / tracy.rees@gradschool.utah.edu
- Fax: 801.585.6749
- Address: campus mail: 302 Park / U.S. Mail: 201 South Presidents Circle #302, University of Utah, Salt Lake City UT 84112-9016

A HANDBOOK FOR THESES AND DISSERTATIONS, is available on the web at The Graduate School Website (www.gradschool.utah.edu), along with the following forms:

- Supervisory Committee Approval and Final Reading Approval, Master’s
- Supervisory Committee Approval and Final Reading Approval, PhD
- Statement of Thesis/Dissertation Approval
- Permission to Quote Copyrighted Material (Master’s)
- Permission to Quote Copyrighted Material (PhD)
- Multiple Author Release for Master’s Thesis
- Multiple Author Release for Doctoral Dissertation

CALENDAR

Manuscripts are accepted at any time during the semester. However, those students wishing to graduate in a specific semester must meet the dates in this calendar.

<table>
<thead>
<tr>
<th>SEMESTER</th>
<th>SUBMISSION OF DEFENDED HARD COPY OF MANUSCRIPT FOR FORMAT APPROVAL</th>
<th>SUBMISSION OF FINAL VERSION FOR THESIS RELEASE</th>
</tr>

<td>November 1, Friday</td>
<td>December 9, Monday</td>
</tr>
</tbody>
</table>

- Manuscripts submitted without proper signature sheets or with significant deficiencies in format have not met the deadline.
- Factors that can result in longer editing times include unavailability of the student to participate in the ongoing editing process, unusually serious problems with format or writing, and manuscript length in excess of 200 pages, which may require up to 20 days for the first reading, as opposed to the typical 5 to 10 days. Please take these factors into account in planning defense and graduation dates. Remember, the earlier a manuscript is submitted, the better the student’s chance of graduating in the desired semester. The manuscript submitted for format approval must be a hard (paper) copy printed single-sided.
- The Thesis Editor will examine corrections on the hard copy prior to giving permission to upload (format approval). Deadlines for resubmission of corrected manuscripts will be indicated on correction sheets.
The University of Utah Graduate School

STATEMENT OF DISSERTATION APPROVAL

The dissertation of ________________________________ type your name here ________________________________ has been approved by the following supervisory committee members:

________________________, Chair ________________________________

and by Donna M. White, Interim Dean of The Graduate School.
The thesis of ___________________________ type your name here ___________________________
has been approved by the following supervisory committee members:

_____________________________ type the name of your chair here ___________________________, Chair

_____________________________ type the name of a committee member here ___________________________, Member

_____________________________ type the name of a committee member here ___________________________, Member

and by ___________________________ type the name of the chair of your department here ___________________________, Chair of
the Department of ___________________________ type the name of your department here ___________________________.

and by Donna M. White, Interim Dean of The Graduate School.
Incorporation of Previously Published, Accepted, and Submitted Articles as Chapters of a Dissertation

1. The dissertation (final product) looks like any other dissertation. In other words, it has the same component parts and the same format as any other dissertation.

2. Each previously published reprint and accepted or submitted article (or chapter as an article prepared for publication) is treated as a separate chapter.

3. The dissertation must have a general abstract that covers all components. A general introduction and general conclusion are recommended.

4. If a dissertation incorporating previously published articles as chapters is selected, references should be placed at the end of each chapter—not at the end of the manuscript. Each set of references may follow a different style guide, depending on the journal in which the chapter is published or will be published.

5. Reprints are acceptable. However, some departments require that previously published articles be reformatted to match all other chapters.

6. The reprints are accepted as they are except they must be single-sided copy only, must fit within the thesis margins, and must be numbered consecutively with the rest of the text. All other chapters (whether accepted, submitted, or in preparation) must fit University of Utah guidelines, as specified in the handbook (margins, subheads, figure and table placement, etc.).

7. In the List of Figures and List of Tables, figures and tables from reprints are treated as if they are numbered with respect to the rest of the text. A local, decimal numbering scheme must be used. For example, in the List of Figures, the first figure in Chapter 5, which is a reprint, is listed as 5.1.

8. The requirement that all print size be at least 2 mm does not apply to reprints.

9. Copyright issues frequently arise with previously published material. Students need to obtain permission to duplicate copyrighted material (and, possibly, multiple author releases).

10. As for any other thesis or dissertation, students are urged to submit their manuscripts prior to the defense for a preliminary review.

11. A full credit line (stating "Reprinted with permission from" followed by the source) must be placed on the part-title page preceding a reprint or as a footnote on the first page of a chapter that contains a previously published article that has been reformatted to match all other chapters.

PERMISSION TO DISTRIBUTE DISSERTATIONS AND THESES
VIA USPACE

USpace collects, maintains, preserves, records, and provides access to the intellectual capital and output of the University of Utah; it reflects the University's excellence and shares that work with others.

Putting scholarship on the Web will lead to greater accessibility and visibility for you as an author. Items in USpace are indexed by Google, which has the potential of increasing readership and, ultimately, the number of citations to your work. Each document receives a unique URL for easy linking and sharing.

USpace is committed to converting file formats (such as PDF) to ensure that your document remains readable and accessible in the future.

I authorize the University of Utah to make a copy of my dissertation or thesis and publicly distribute it via USpace, the University of Utah's Institutional Repository http://uspace.utah.edu.

Unlike objects, however, transformations are not instantiated alone, i.e., an instance of transformation is a transformation of an instance of an object and the result is a transformed object.

Summary statistics were used from each study and summarized using statistical tests.

The mortality for this study was intact.

The bureaucracies and inefficiencies of this system stagnated the economy and reforms were implemented gradually as problems arise.

The majority of students echoed Rob's sediments.

Many of these children come from homes in which abuse and neglect are commonplace and alcoholism and drug abuse are rampant. As a result, these children grow up completely immortalized and develop character traits that are characterized by illiteracy, illicit drug use, and violent crime.

Deaths from cardiovascular diseases were particularly high in this study for both male schizophrenics (standardized morality ratio = 4.1) and nonschizophrenics (standardized morality ratio = 4.34).
As I was a child I had incidences of being semi-conscience in the sleep-state.

1st version: OWB expanded to four continents (England, U.K., Germany, and East Africa) during the 1950s.
2nd version: OWB expanded to four countries (England, U.K., Germany, and East Africa) during the 1950s.

Leslie Stall. I wouldn’t care if Leslie Stall told me the truth ten times a day. I think she’s a geek. Because she is so negative. I’ve never heard her give positive to anybody. She is really . . . She loves dirt . . . I mean Barbara Walters is kind of a “mamdy pamdy” kind of reporter. And she goes for the dirt and the juggler, and she won’t let you off the hook. Or, she doesn’t let the people off the hook. But she still has a personality . . .

Because teaching is an Anglo American female profession, the decline of the quality in the teaching force will continue.

Participant 2 is a mother of one child who was married to the biological father. Participant 4 is the father of two adopted children who was married.

As a young child, his mother took him to see films of Hollywood musicals. Seeing Gene Kelly inspired in him a desire to dance, and at the age of eight his parents arranged for him to take acrobatic dancing and tap classes, to which he later added ballet.

The in the same study 86.1% of the students reported having sex at once in their life time.

In addition to fear and embarrassment, the group stated that a sexual double standard was another barrier to sexual communication and, therefore, was a good sex education experience with their parents.

The algorithms used by Petrify were lame.

- All the spin exchange stuff is taken from Nelson thesis.
- Hbar is just the usual thing
- Some French guy’s fluid dynamics equation tells us that the velocity of a
  \[ v = \frac{v_{\text{max}} (1 - \frac{r^2}{R^2})}{R} \]
  where \( r \) is the radial distance, \( R \) is the radius of the cell, and \( v_{\text{max}} = \frac{2 \frac{N_u}{A_g}}{5} \) is the maximum velocity of the gas.
